

10 REASONS TO CHOOSE TERRAM BODPAVE™85

- From car parks to cycle paths, TERRAM Bodpave™85 porous pavers provide a strong, interlocking paving cell system for grass reinforcement, ground stabilisation and gravel retention surfaces.
- If you are looking for a durable, eco-friendly surface that can withstand the pressures of constant heavy traffic, here are 10 reasons to choose Bodpave™85...

TERRAM

Geosynthetics you can trust

REASONS TO USE TERRAM BODPAVE™85

Quick install and handling

We deliver Bodpave™85 in pre-connected 1m² sections. This means reduced installation time and easy handling for the installation team.

REASONS TO USE TERRAM BODPAVE™ 85

Strong connections

Our simple snap-fit system means under/over links work together to increase overall strength. And the 24 fully interlocking points per paver deliver a strong and stable overall hold; making them less likely to come apart when traffic moves over them.

REASONS TO USE TERRAM BODPAVE™ 85

We can take the pressure

Bodpave™ 85's compressive strength per meter square is an unmatched 400 tonnes when filled.

Geosynthetics you can trust

REASONS TO USE TERRAM BODPAVE™85

A smooth ride

Thanks to its 18, 35mm moulded ground spikes per paver – greater and longer than competitor products – Bodpave™85 is less likely to buckle as vehicles manoeuvre over pavings.

REASONS TO USE TERRAM BODPAVE™85

Making the grade

Bodpave™85 will only need fixing pins on exceptional gradients, beating many competitor products which demand pinning on all installations.

REASONS TO USE TERRAM BODPAVE™85

Keep on trucking

Heavy loads and the high tyre pressure of coaches are no problem for Bodpave™85, as its substantial base helps spread vehicle load.

REASONS TO USE TERRAM BODPAVE™85

An absorbing proposition

Bodpave™85 is designed to absorb expansion and contraction so changes in temperature won't affect its performance and reliability.

REASONS TO USE TERRAM BODPAVE™85

Green credentials

Not only are the Bodpave™85 cells made from 100% recycled polymer but they are made to retain moisture – Bodpave™85's porous surfaces allow rainwater to get directly into the sub-soil.

 **TERRAM**
Geosynthetics you can trust

REASONS TO USE TERRAM BODPAVE™85

Flexible design

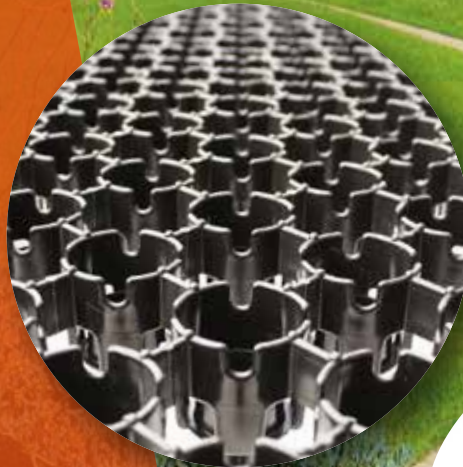

Flexible design – Corners are no problem. Bodpave™85 can be offset by one-cell increments to fit around obstacles while still maintaining strong connections to adjacent pavers.

REASONS TO USE TERRAM BODPAVE™85

Best of British

Bodpave™85 is manufactured
to exacting standards
in the UK.

 **TERRAM**
Geosynthetics you can trust

TERRAM excels in the innovative application of technology to create versatile, high-performance materials which are unique, cost-efficient and deliver significant added value.
