WHERE TRADITION MEETS TECHNOLOGY

As part of the Bridgestone family of companies, Firestone has been a world-recognized leader in rubber polymer technology for over 100 years. Building on this broad legacy, Firestone Specialty Products has become the most trusted name in lining and geomembrane applications. For nearly three decades, we have built a reputation of excellence in commercial and industrial geomembrane markets. Our knowledgeable staff, agents and network of distributors provide an unmatched level of service and support to contractors, architects, engineers, consultants, general contractors and government agencies around the world.

QUALITY AND ACCOUNTABILITY

At Firestone Specialty Products, we are equally dedicated to our clients and our community. While producing superior products and systems designed to exceed our customers’ expectations is an ongoing goal, we believe environmental, health and safety issues are just as important to building a successful and socially responsible business. Firestone Specialty Products continually strives to maintain stringent manufacturing processes, improve our environmental management systems and take an active role in our surrounding communities.

FIRESTONE SPECIALTY PRODUCTS DELIVERS

In addition to superior products and superior service, Firestone Specialty Products is also committed to providing unsurpassed product availability. With a world-wide network of distributors and jobsite delivery available to the commercial and industrial markets, you can be assured that the quality and value of Firestone’s geomembrane systems are never far away.

COMMERCIAL AND INDUSTRIAL APPLICATIONS
Always A Perfect Fit

Firestone Specialty Products’ geomembranes are the durable, dependable solution for nearly any application. Whether for decorative commercial water features or critical containment applications such as agriculture, aquaculture, mining and other water containment, Firestone’s geomembrane systems are easy to install and built to last.

Firestone understands the intricacies of each project and provides the experience to manage the challenges you face. With critical concerns ranging from the logistical and legislative to the technical and environmental, Firestone associates provide comprehensive support to ensure your project complies with all regulations and remains within scope.

This commitment to proven products backed by superior service is why so many professionals, in both the public and private sectors, have turned to Firestone Specialty Products for their geomembrane needs.

Firestone EPDM Geomembrane

Available in standard or reinforced with a scrim, Firestone EPDM Geomembrane systems offer the strength and resilience to perform in many of the most demanding environments. This makes Firestone EPDM Geomembrane ideal for:

- Agricultural Pits and Ponds
- Aquaculture Applications
- Canals
- Constructed Wetlands
- Decorative Water Features
- Evaporation Ponds
- Exposed Covers and Caps
- Golf Course Water Features
- Landscaping Features
- Mining Applications
- Retention Ponds
- Water Reservoirs

**EASY TO INSTALL**

Firestone EPDM Geomembrane is available in a variety of membrane panel sizes to reduce the amount of field seaming needed. Additionally, Firestone’s QuickSeam™ Tape provides an easy and dependable seam solution without requiring special tools or utilities for installation.

**EXTREMELY FLEXIBLE**

Firestone EPDM Geomembrane can elongate over 300 percent, offering exceptional conformance and lay flat characteristics that are ideal for irregular shapes and contours.

**EXCELLENT WEATHERING RESISTANCE**

Even when exposed to UV, ozone, extreme temperatures and other harmful environmental conditions, Firestone EPDM Geomembrane’s specially compounded material prevents cracking. The result is outstanding age stability with little or no maintenance.

**FISH AND PLANT FRIENDLY**

Firestone EPDM Geomembrane is specifically formulated to be safe for fish and plant life. Please visit our Web site for the most current technical information.

Firestone fPP-R Geomembrane

Firestone fPP-R Geomembrane is a polypropylene/rubber-based membrane. Our standard product is reinforced with a scrim inserted between the top and bottom plies but it is also available in a non-reinforced panel. Flexible and heat-weldable, Firestone fPP-R Geomembrane is perfect for a variety of exposed and subsurface applications, including:

- Agricultural Pits and Ponds
- Aquaculture Applications
- Canals
- Evaporation Ponds
- Exposed Covers and Caps
- Floating Covers
- Golf Course Water Features
- Groundwater Features
- Mining Applications
- Water Conservation Applications
- Water Reservoirs

**DURABILITY**

Designed with exceptional tensile strength and excellent chemical and environmental stress-cracking resistance, Firestone fPP-R Geomembrane protects against punctures and remains unaffected by UV, ozone and soil bacteria. In addition, heat-welded seams mean Firestone fPP-R Geomembrane can be installed in relatively low ambient temperatures and ensures long lasting seams.

**FIELD INSTALLATION**

Firestone approved applicators can have pre-fabricated, large, custom sized panels delivered to your project location, reducing installation cost.

**POTABLE AND ENVIRONMENTALLY FRIENDLY**

Firestone fPP-R is plasticizer and chlorine free. A certificate of NSF water purity is available if requested with placement of material order.

**ACCESSORIES**

Our fPP-R Geomembrane system is complimented by a full line of accessories including Firestone fPP-R Flashing and Firestone fPP-R Welding Rod, making Firestone Specialty Products a convenient, one-stop source of materials for any commercial water feature or critical containment application.
