DIAMONDGRID™

RIDING FOR THE DISABLED MURWILLUMBAH

THE PROBLEM

The Murwillumbah RDA had some issues with their horse stables becoming very swampy from some underground springs, creating very muddy horse stables. With the RDA being a charity, they were looking for a cost effective solution to stable flooring.

THE SOLUTION

- ◆ Geo Fabric was laid over the muddy surface
- ◆ 4 inches of sand was then spread over the fabric and levelled.
- ◆ Diamond Grid laid.
- ◆ Sand filled into grids and also an extra 3 inches over the top of the grids for the horses to stand and lay on.
