

Project Profile

Helicopter Landing Pads

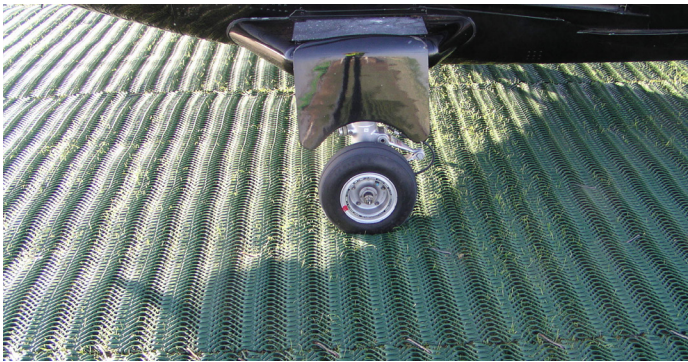

Overview

Faced with a challenge in early 2012, Austin engineers Carlson, Brigance & Doehring (CBD) understood the requested helicopter pads at the Circuit of the Americas weren't just for shuttling patrons to and from the venue. These pads would also serve as a critical link for emergency medical teams. CBD chose Fiberweb's GrassProtecta

to ensure that more than 2300 landings and take-offs would come off without a hitch, regardless of weather or ground conditions. The helicopter pads have received high praise from the Federal Aviation Administration and as a result the Circuit of the Americas has chosen GrassProtecta for nearby vehicular parking, work to begin in the summer of 2013.

Quick Facts

- Project: Circuit of the Americas
Address: 9201 Circuit of the Americas Boulevard
Austin, Texas
Product: TYPAR GrassProtecta™ HD
Install Date: November 2012
Designer: Carlson, Brigance & Doehring
Austin, Texas
Contractor: Austin Road and Bridge
Distributor: GeoSolutions, Inc.
7011 Bee Caves Road
Austin, TX 78746
Project Size: 18,000 Square Feet
