EXCEL S-1 RAPID GO™

Specifications

Western Excelsior manufactures a full line of Rolled Erosion Control Products (RECPs). Excel S-1 Rapid Go temporary Erosion Control Blanket (ECB) is composed of a 100% High Altitude Rocky Mountain Aspen Excelsior matrix mechanically (stitch) bonded on two inch centers to a single photodegradable, synthetic net. The netting of the S-1 Rapid Go ECB is treated to accelerate the degradation process.

The excelsior matrix consists of curled, machine produced fibers with greater than eighty percent longer than six inches. The nominal weight of the product is 0.98 pounds per square yard. Excel S-1 Rapid Go blanket is available in natural color or dyed green and is recommended for use in channels or slopes requiring erosion protection for a period of up to ninety days. Actual field longevity is dependent on soil and climatic conditions.

Each roll of EXCEL S-1 Rapid Go is made in the USA and manufactured under Western Excelsior's Quality Assurance Program to ensure a continuous distribution of fibers and consistent thickness. Typical manufactured properties are provided in Table 1 and netting characteristics are provided in Table 2.
