

VENTURA COUNTY PUBLIC WORKS - VENTURA, CA

PROJECT DESCRIPTION

A two mile segment of the two-lane, rural Canada Larga Road in Ventura County, CA was in bad shape after 30 years of use with no major rehabilitation. **When it came time to lay new pavement, a 2" rubberized asphalt overlay reinforced with FORTA-FI[®] was chosen for one mile and a 2" rubberized overlay with no fiber was chosen for the second mile.** Cracking on both segments will be evaluated over the next several years.

KEY POINTS

- Extended Pavement Life
- Reduced Rutting & Raveling
- Reduced Cracking

DETAILS

Date: April 2013
