1. Product and Company Identification

Material name: VOLCLAY® CP-200
Version #: 02
Revision date: 18-August-2009
Synonym(s): BENTONITE * SMECTITE CLAY
Company: CETCO
Lining Technologies Group
2870 Forbs Avenue
Hoffman Estates, IL 60192 US
safetydata@amcol.com
http://www.cetco.com/LT/
General Information (800) 527-9948
Emergency (800) 424-9300

2. Hazards Identification

Emergency overview: Material can be slippery when wet

Potential health effects:
Routes of exposure: Inhalation.
Eyes: Dust or powder may irritate eye tissue. Symptoms include itching, burning, redness and tearing.
Skin: Non-irritating to the skin.
Inhalation: Repeated or prolonged inhalation may cause toxic effects. For additional information on inhalation hazards, see Section 11 of this safety data sheet.
Ingestion: No significant adverse effects are expected upon ingestion of the product.

Target organs: Lungs.
Chronic effects: Overexposure to dust may result in pneumoconiosis, a respiratory disease caused by inhalation of mineral dust, which can lead to fibrotic changes to the lung tissue, or silicosis, a respiratory disease caused by inhalation of silica dust, which can lead to inflammation and fibrosis of the lung tissue.

3. Composition / Information on Ingredients

The manufacturer lists no ingredients as hazardous according to OSHA 29 CFR 1910.1200.

Composition comments: Bentonite contains naturally occurring crystalline silica (not listed in Annex I of Directive 67/548/EEC) in quantities less than 6%. Occupational Exposure Limits for impurities are listed in Section 8.

4. First Aid Measures

First aid procedures:
Eye contact: Flush eyes immediately with large amounts of water. If irritation persists get medical attention.
Skin contact: No special measures required. Get medical attention if irritation develops or persists.
Inhalation: Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Get medical attention, if needed.
Ingestion: No special measures required. If ingestion of a large amount does occur, seek medical attention.

Notes to physician: Provide general supportive measures and treat symptomatically.

5. Fire Fighting Measures

Flammable properties: This material will not burn.
Extinguishing media:
Suitable extinguishing media: Use any media suitable for the surrounding fires. Dry chemical, CO2, water spray or regular foam.

Protection of firefighters:
Protective equipment and precautions for firefighters: Material can be slippery when wet.
Hazardous combustion products
None known.

6. Accidental Release Measures

Personal precautions
Material can be slippery when wet. Wear a dust mask if dust is generated above exposure limits.

Environmental precautions
No special environmental precautions required.

Methods for cleaning up
Avoid the generation of dusts during clean-up. Collect dust or particulates using a vacuum cleaner with a HEPA filter. Reduce airborne dust and prevent scattering by moistening with water.

7. Handling and Storage

Handling
Keep formation of airborne dusts to a minimum. Provide appropriate exhaust ventilation at places where dust is formed. In case of insufficient ventilation, wear suitable respiratory equipment.

Storage
Guard against dust accumulation of this material. No special storage conditions required. No special restrictions on storage with other products.

8. Exposure Controls / Personal Protection

Occupational exposure limits

Exposure guidelines
Occupational exposure to nuisance dust (total and respirable) and respirable crystalline silica should be monitored and controlled.

Engineering controls
If material is ground, cut, or used in any operation which may generate dusts, use appropriate local exhaust ventilation to keep exposures below the recommended exposure limits. If engineering measures are not sufficient to maintain concentrations of dust particulates below the OEL, suitable respiratory protection must be worn.

Personal protective equipment

Eye / face protection
Wear dust goggles.

Skin protection
No special protective equipment required.

Respiratory protection
Use a particulate filter respirator for particulate concentrations exceeding the Occupational Exposure Limit.

General hygiene considerations
Use good industrial hygiene practices in handling this material. Eye wash fountain is recommended.

10. Chemical Stability & Reactivity Information

- **Chemical stability**: Stable at normal conditions.
- **Conditions to avoid**: None known.
- **Incompatible materials**: None known.
- **Hazardous decomposition products**: None known.
- **Possibility of hazardous reactions**: Will not occur.

11. Toxicological Information

- **Local effects**: Mild irritant to eyes (according to the modified Kay & Calandra criteria).
- **Chronic effects**: In 1997, IARC (the International Agency for Research on Cancer) concluded that crystalline silica inhaled from occupational sources can cause lung cancer in humans. However in making the overall evaluation, IARC noted that "carcinogenicity was not detected in all industrial circumstances studied. Carcinogenicity may be dependent on inherent characteristics of the crystalline silica or on external factors affecting its biological activity or distribution of its polymorphs." (IARC Monographs on the evaluation of the carcinogenic risks of chemicals to humans, Silica, silicates dust and organic fibres, 1997, Vol. 68, IARC, Lyon, France.)

  In June 2003, SCOEL (the EU Scientific Committee on Occupational Exposure Limits) concluded that the main effect in humans of the inhalation of respirable crystalline silica dust is silicosis. "There is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis (and, apparently, not in employees without silicosis exposed to silica dust in quarries and in the ceramic industry). Therefore, preventing the onset of silicosis will also reduce the cancer risk..." (SCOEL SUM Doc 94-final, June 2003)

  According to the current state of the art, worker protection against silicosis can be consistently assured by respecting the existing regulatory occupational exposure limits. Occupational exposure to nuisance dust (total and respirable) and respirable crystalline silica should be monitored and controlled.

- **Sensitization**: Not a skin sensitizer.

- **Carcinogenicity**
  - IARC Monographs: Overall evaluation
    - QUARTZ (14808-60-7) 1 Carcinogenic to humans.
    - US ACGIH Threshold Limit Values: A2 carcinogen
      - QUARTZ (14808-60-7) Group A2 Suspected human carcinogen.
    - US NTP Report on Carcinogens: Known carcinogen
      - QUARTZ (14808-60-7) Known carcinogen.

* Estimates for product may be based on additional component data not shown.

Ecotoxicity

The product is not expected to be hazardous to the environment. This product is not expected to produce significant ecotoxicity upon exposure to aquatic organisms and aquatic systems.

Environmental effects

Ecological injuries are not known or expected under normal use. Based on the physical properties of this product, significant environmental persistence and bioaccumulation would not be expected.

Persistence and degradability

Not available.

13. Disposal Considerations

Disposal instructions

Dispose in accordance with all applicable regulations. Material should be recycled if possible.

14. Transport Information

DOT

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

IMDG

Not regulated as dangerous goods.

15. Regulatory Information

US federal regulations

OSHA Process Safety Standard: This material is not known to be hazardous by the OSHA Highly Hazardous Process Safety Standard, 29 CFR 1910.119.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

Hazard categories

- Immediate Hazard - No
- Delayed Hazard - Yes
- Fire Hazard - No
- Pressure Hazard - No
- Reactivity Hazard - No

Section 302 extremely hazardous substance

No

Section 311 hazardous chemical

Yes

Inventory status
