

## Geomembrane Liner Evaluation Reports (GLER)

### What are Geomembrane Liner Evaluation Reports (GLER)?

The purpose of the geomembrane/geosynthetic liner evaluation report is to assure that liner has been installed correctly and has been inspected. This is the final report prepared for our clients to turn in with pictures, inspection reports, and more, signifying that the liner has been installed correctly. Our liner evaluation reports are certified and sealed by a professional engineer.

### What are the benefits of our Geomembrane Liner Evaluation Reports (GLER)?

This liner evaluation report is required to document that the liner was constructed in conformance with the approved construction plans and QA/QC plan. Our team is familiar with many styles of liners. We specialize in EPDM liners and will manage the design from start to finish.
